MODERN MEETS VINTAGE

Vintage furniture is on the rise, and reissues of iconic pieces are flourishing this year.

Many Parisian Deco Off/Home brands are revisiting their past collections, especially in the lighting sector, such as **Original BTC**, whose early model, the Hector lamp, remains a best-seller in all its variations.

Similarly, **Charles Paris's** bronze pieces, whose Iconiques collection is inspired by masterpieces created over time, as well as **Fortuny's** house, all reimagined with the latest technology.

On the painting side, **Little Greene** has recreated over 50 colors by analyzing the shades of historic homes across the ages, particularly from the 1930s to the 1970s.

DECO IDEA

Autumn Balcony: Your Winter Cocoon

There's still time to savor the magic of October and its gentle golden light by transforming your terrace into a true autumn garden. Picture it: a few simple touches — lighting a warm fire pit, arranging colorful cushions and an ultra-soft outdoor rug, draping your furniture with cozy faux furs, and setting the mood with soft, glowing lights. Add plants with warm orange hues and cheerful round pumpkins for a festive burst of color. All that's left is to wrap yourself in a snug blanket and enjoy the crisp air before winter's first chill sets in. An autumn moment to embrace fully, between comfort and nature!
